

Closing a loved one's online accounts, handled for you.

Facebook, Instagram, email, and other online accounts stay active after someone dies. Closing them means forms, documents, and long waits with each platform. We take all of that off your hands.

- **No passwords needed.** We work with each platform's official process, using the documents you already have.
- **One point of contact.** You send us the paperwork once. We handle every platform and follow up until it is done.
- **A written record.** You receive a complete summary of every account closed or memorialised, for the family and the estate.
